CLATUU *α*

BELIEVE IN COOL

Finally! A treatment superior to any workout, injections, or dieting regimen. The CLATUU Alpha freezes off stubborn fat providing complete coverage anywhere on your body.

**FREEZE YOUR
FAT AWAY**

**COOLING FROM
CHIN TO KNEES**

**LUNCHTIME
PROCEDURE**

**NO NEEDLES,
NO INJECTIONS**

**ZERO
DOWNTIME**

LOSING FAT THE α WAY

After your midnight snack

Fat cells in your body grow depending on how many calories and trans fats you consumed.

Even after exercise

You may have shrunk your bulges while burning off those calories, but your fat cells still remain.

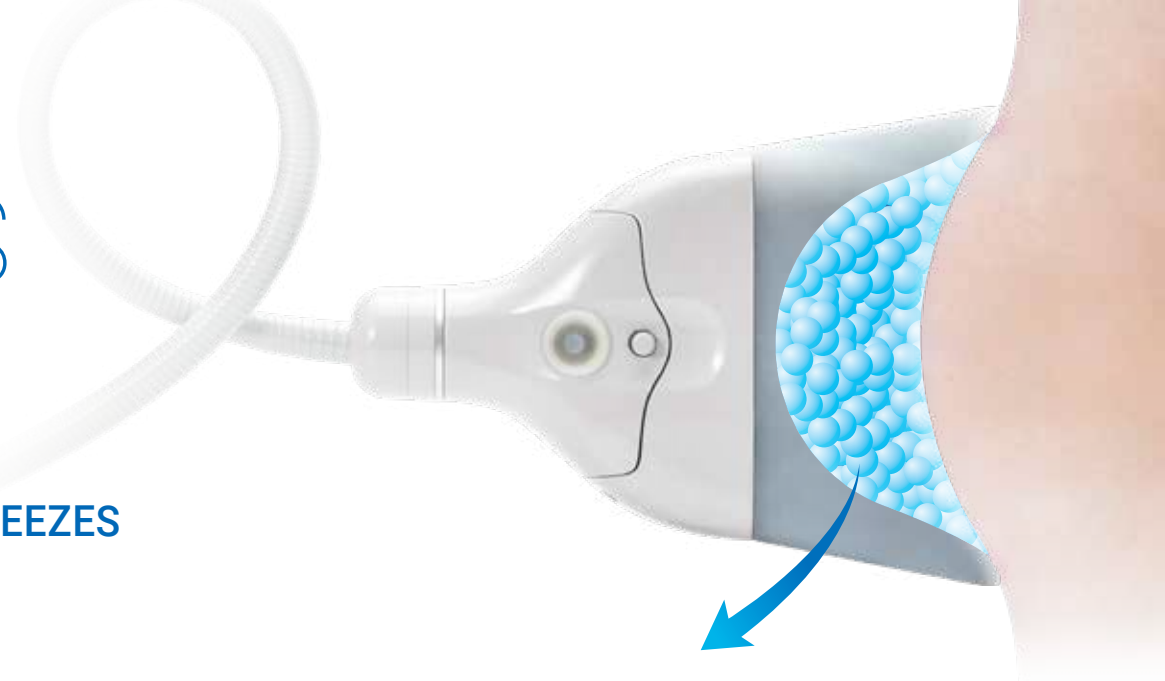

INSTEAD, KILL OFF STUBBORN FAT WITH α

Freeze away stubborn fat on your body for good, with healthier, slimmer days at your doorstep.

HOW α SLIMS YOU DOWN

THE SCOOP ON HOW THE CLATUU ALPHA FREEZES AWAY STUBBORN FAT.

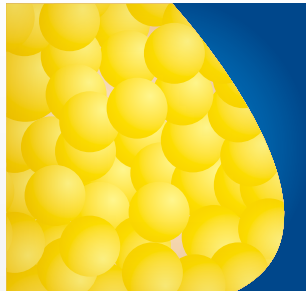

1

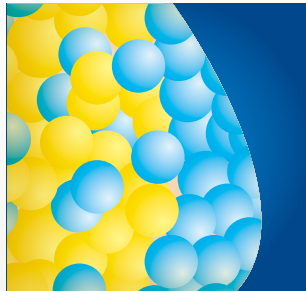

You may struggle with stubborn fat even after jogging and dieting.

2

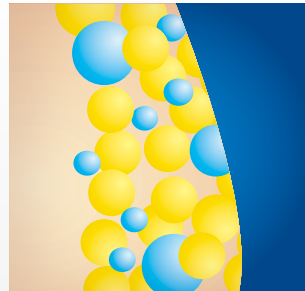

The CLATUU Alpha suctions your skin and subcutaneous layers.

3

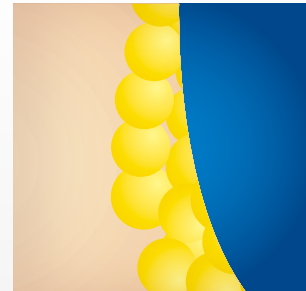

Cooling energy then freezes fat deposits to induce apoptosis.

4

Crystallized fat cells die off through the body's natural metabolism.

5

Remaining fat in the target area becomes leaner and less dense.

6

Combine with your healthy regimen to look slimmer and confident.

Q&A

Q. What is the CLATUU Alpha advantage?

The CLATUU Alpha can non-invasively freeze off significant fat from your double chin to the knees, thanks to the technology's 360° Surround Cooling that provides body contouring like no other.

Q. How is fat naturally removed from the body by the CLATUU Alpha?

Cooling cups generate freezing temperatures into your stubborn fat. During treatment, crystallized fat cells start to die off and are processed as naturally as the salad you had for brunch.

Q. How long does each session take?

Depending on the area targeted, your treatment should take up between 40-60 minutes. Rest assured, your doctor will carefully select which cooling times are optimal for a fully effective session.

Q. Is there any pain during the CLATUU Alpha treatment?

You may feel slight tugging and pinching on your skin into the first 5 treatment minutes, but the numbing eventually gives you more than enough comfort to partake in other leisure activities.

Q&A

Q. Are there any side effects?

You may experience slight redness, bruising, and soreness after initial numbing in the target areas subside. Such adverse effects, however, shouldn't prevent you from your daily routine.

Q. When can I expect real results with the CLATUU Alpha?

If you keep up with new eating habits and workouts recommended by your doctor after treatment, expect impressive fat reduction changes over the course of 4 weeks up to the 3-month mark.

Q. Is the CLATUU Alpha right for me?

If you struggle with stubborn fat just about anywhere on your body and won't burn off simply from morning jogs and costly dieting regimens, talk to your doctor about planning your own session.

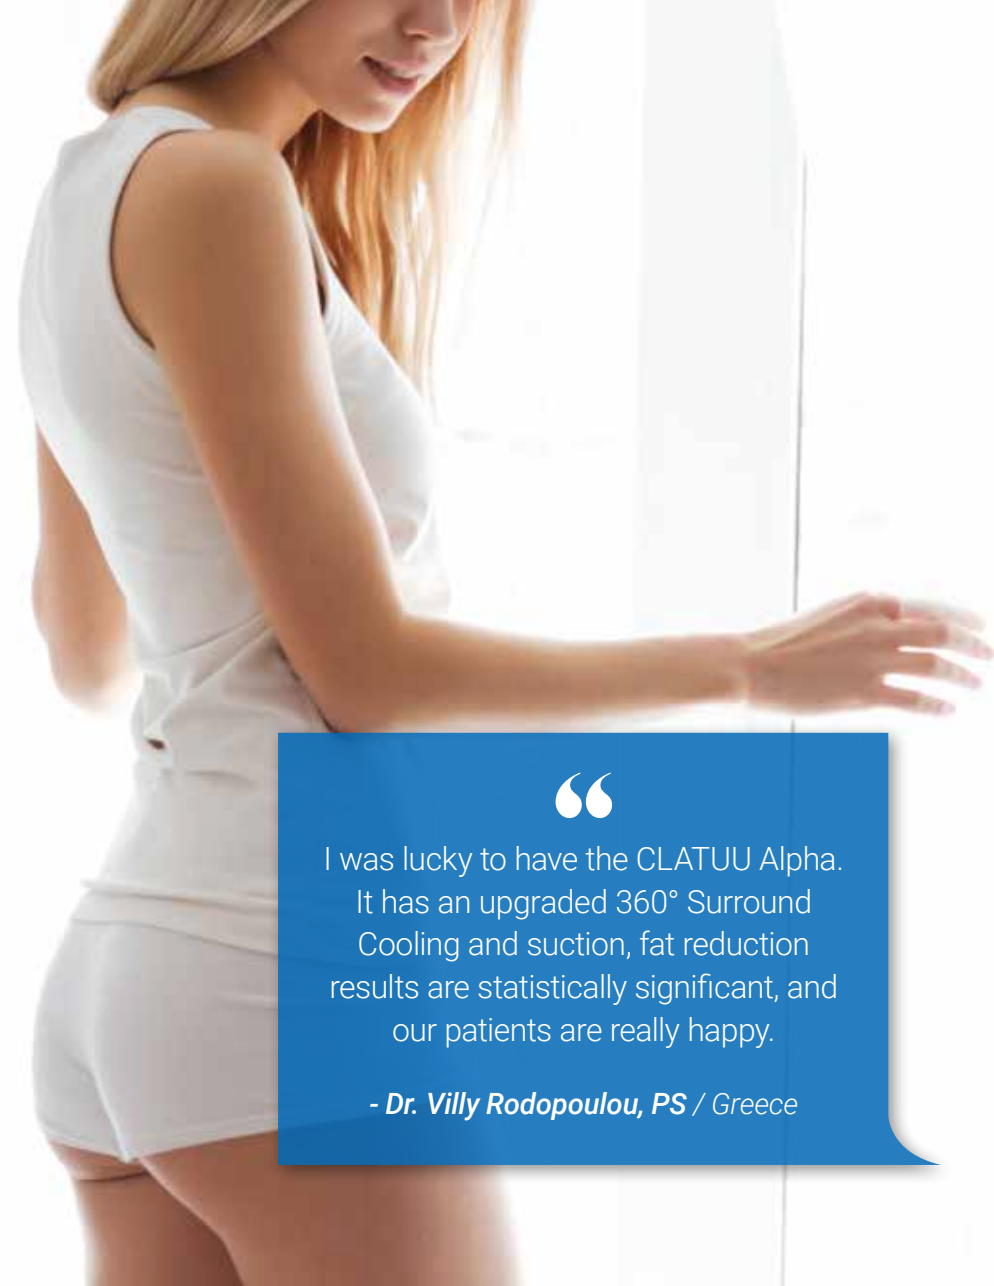

Q. Can I get additional treatments after my CLATUU Alpha session?

Certainly! Check with your doctor if you qualify for treatments 4 weeks after your first session. Until then, you can also receive massage therapy to boost circulation for the ultimate look you desire.

I was lucky to have the CLATUU Alpha. It has an upgraded 360° Surround Cooling and suction, fat reduction results are statistically significant, and our patients are really happy.
